

XM Radio is a service I pay for and feel that it should not be restricted in any manner as to information it can provide to those of us who count on it in our work place and our enjoyment in our lives. After all is this not the land of free enterprise. If the other means of broadcasting can not keep up so be it. We have been forced to listen to what they have given us as they wished for years.

I am against HR 4026!!!
